# Breaking Through In IBD

Milan, Grand Visconti Palace Hotel

November 25-26, 2016

WITH THE SUPPORT OF

UNIVERSITÀ DEGLI STUDI  
DI MILANO

## WELCOME

The President, the Scientific Committee and the organizing agency welcome you in Milan at "Breaking through in IBD". This meeting has been organized to go through and discuss together about the main issues that still represent a matter of debate in IBD. Indeed, these topics are still many, since IBDs are very complex diseases representing an everyday challenge due to many diagnostic and therapeutic issues that IBD doctors have to face. The meeting will be organized in 5 major sessions, each one devoted to specific aspects of the diseases; four of them, besides specific lectures, will also contain breakout sessions focusing on representative cases of complex IBD. These sessions will give to all participants a chance to discuss very practical issues in a very interactive relationship with tutors. Besides the scientific part of the meeting, we believe that you will also enjoy the very lively character of Milan, which is usually cold and foggy at this time of the year, but still maintains its flavor of international and active city.
