A bit of context

MIMI-7 "Montecatini Interactive Medicine International" is a sequel of the MIMI I-VI meetings, which were held periodically in Montecatini Terme, in the heart of Tuscany, after the very first one that took place in february 2005. These were inspired by Andrew K. Burroughs' idea of a cyclic educational and interactive event for young trainee doctors, thus becoming a regular event in the Italian gastroenterology calendar.

The format of the meeting continues to be based on a series of interactive multidisciplinary **CLINICAL CASE DISCUSSIONS** in Gastroenterology, involving young trainee doctors and a panel of experts, including pathological, radiological and surgical expertise (other specialists where applicable), interspersed with questions directed to the audience, to be voted on simultaneously, which will serve as a subsequent point of discussion among the panel members.

We aim to confirm the presence (in selected cases) of the patient himself in the panel who will explain his/her history and discuss it with the experts. This was a novelty in MIMI-6 and was very well received by the people involved and the audience.

Moreover some shorter dynamic face-to-face sessions ("**MIMI-7 BOXING RING**") will be part of the scientific program. These will see two (or more) international experts facing each other on selected clinical scenarios (presented by young trainee doctors), comparing two different techniques or strategies. The idea of the "BOXING RING" was borrowed from an original (unfortunately never realized) project by our unforgettable friend Claudio Puoti, who was a regular guest of previous MIMI editions; this is our way of honoring his memory.

Finally, we have planned some "**LECTURES**" on topical subjects in gastroenterology and hepatology, and a "**ROUNDTABLE**" with **UEG delegates**. The latter, which will be focused on the burden of obesity and related digestive diseases and cancers, follows the high profile, multi-stakeholder event organized on June 5th 2025 at European Parliament in Bruxelles by UEG Public Affair Group.

We are proud to have been able to confirm 24 free participations (including hotel accommodation) for young trainee doctors from all over Italy (AIGO, SIED, SIGE, AGGEI) and 2 intriguing **HANDS-ON SESSION** (small groups, parallel to the plenary session).

MIMI-7 "Montecatini Interactive Medicine International" è il sequel dei meeting MIMI I-VI, organizzati periodicamente a Montecatini Terme, nel cuore della Toscana, dopo la prima edizione del febbraio 2005, ispirato dall'idea di Andrew K. Burroughs di un evento ciclico formativo e interattivo per i giovani medici in formazione, diventando così un appuntamento fisso nel calendario della gastroenterologia italiana.

Il format dell'incontro continuerà a basarsi su una serie di **CLINICAL CASE DISCUSSIONS** interattive multidisciplinari in Gastroenterologia, coinvolgendo giovani medici specializzandi e un panel di esperti, tra cui patologi, radiologi e chirurghi (eventualmente altri specialisti), intervallate da domande rivolte al pubblico, per televoto simultaneo, che serviranno come successivo punto di discussione tra i membri del panel e per la relazione conclusiva.

Vogliamo confermare la presenza (in casi selezionati) del paziente stesso nel panel, che spiegherà la sua storia e la discuterà con gli esperti. Questa è stata una novità di MIMI-6 ed è stata accolta molto bene da tutte le persone coinvolte e dal pubblico.

Inoltre, saranno parte integrante del Programma Scientifico alcune sessioni dinamiche più brevi, face-to-face ("**MIMI-7 BOXING RING**"), che vedranno due (o più) esperti internazionali confrontarsi su scenari clinici selezionati (presentati da giovani medici), mettendo a confronto due diverse tecniche o strategie. L'idea del "BOXING RING" è mutuata da un progetto originale (purtroppo mai realizzato) del nostro indimenticabile amico Claudio Puoti, che è stato ospite fisso delle precedenti edizioni del MIMI; in questo modo vogliamo onorare la sua memoria.

Abbiamo infine previsto alcune "**LECTURES**" su argomenti di attualità in gastroenterologia ed epatologia, e una "**UEG ROUNDTABLE**"; quest'ultima, incentrata sulla pandemia di obesità, malattie digestive e tumori ad essa correlati, fa seguito all'evento multilaterale di alto profilo, organizzato su tale problematica dal Public Affair Group UEG al Parlamento Europeo il 5 giugno 2025.

Siamo orgogliosi di essere riusciti a confermare 24 partecipazioni gratuite (comprehensive di sistemazione alberghiera) per giovani medici (AIGO, SIED, SIGE, AGGEI) provenienti da tutta Italia e 2 **HANDS-ON SESSION** a piccoli gruppi.
